## WEB & APP DEVELOPER

Passionate web and app developer with expertise in building user-centric applications using Flutter for mobile development and React with Spring Boot for web development. Skilled in creating dynamic, responsive, and scalable solutions, I thrive on turning ideas into reality through clean, efficient code and innovative problem-solving.

---

## PROJECTS

### MINESWEEPER CASINO

Aug 2024

Minesweeper Casino is a React-based game where players pick from 25 boxes, aiming to avoid mines for profit. The game features an intuitive UI and includes a unique option to control win or lose outcomes, highlighting the lack of fairness in casino games and demonstrating how outcomes can be manipulated. This project serves as a cautionary tale against the illusion of quick success.

---

### WORTHY: SMART TRANSACTION TRACKER

May 2024 – June 2024

Worthy is a smart transaction tracking app designed to help users manage their finances effortlessly. It allows users to add transactions, categorize expenses, and monitor account balances. With Hive for secure data storage and Riverpod for efficient state management, Worthy offers a seamless and organized way to track spending and plan future expenses.

### GETSPASH: IMAGE GALLERY

Dec 2020

A responsive image gallery built with HTML, CSS, JavaScript, and jQuery. It fetches images from Unsplash based on user searches and tracks search history. Users can download images in high quality and view author details and Instagram handles. Features include grid layout and animate-on-scroll effects.
